

January 2021

Dear Administrator,

Real OT Solutions is developing a cursive companion to the Size Matters Handwriting Program, a proven and practical approach to teaching printing.

We believe this will be a game-changing and welcomed complement to your curriculum. While building on the Size Matters core concepts that expedite children's leap into legible writing, SMHP Cursive promotes inclusive, responsible and charitable citizenship. Each practice page introduces vocabulary and themes about disability awareness and acceptance in kid-friendly narratives. This is followed by age and grade-level appropriate discussion topics and questions.

But there's more!

The book will be illustrated by exceptional children.

With 62 letters needing original artwork, we launched an Art Contest. Winning entries will be credited in the book, 'hung' in our virtual online Art Gallery, and awarded a prize. *

Clearly, permission by both you and the parents/guardians are needed. We would be most grateful for your cooperation, referencing your school too, if so desired.

Please check those boxes to which you agree.

- Our student *(insert name)* _____ has permission to submit artwork created by him/her to Real OT Solutions for use in their cursive workbook.
- Our student *(insert name)* _____ does not have permission to submit artwork created by him/her to Real OT Solutions for use in their cursive workbook.
- School name may be included in credits as: *(insert School name)*

- Child artist may work on this project during school time.
- Child artist may seek guidance from the school Art Teacher.
